MINNESOTA

2026-2029 STATE TRANSPORTATION IMPROVEMENT PROGRAM (STIP)

OCTOBER 2025

DEPARTMENT OF TRANSPORTATION

LETTER OF ENDORSEMENT

Dear Minnesotans,

The State Transportation Improvement Program (STIP) is a comprehensive, four-year schedule of planned transportation projects to maintain and improve the transportation system in Minnesota for state fiscal years 2026, 2027, 2028 and 2029. These projects are for state trunk highways, local roads and bridges, rail crossings, port development and transit capital and operating assistance. This document represents an investment of over $13 billion in federal, state and local funds over the four years.

The STIP is the statewide transportation program on which the Minnesota Department of Transportation, state and local governments and community and business interest groups worked together in eight District Area Transportation Partnerships (ATPs), discussed regional priorities and reached agreement on important transportation investment decisions.

The process was refined through the coordinated efforts of MnDOT collecting input from legislators, state and federal agencies, metropolitan planning organizations, local and tribal governments, transportation providers, citizens and other interested parties, to encourage diverse viewpoints and promote equity in decision making.

The Infrastructure Investment and Jobs Act (IIJA), passed in November 2021, authorized federal funding for Minnesota's transportation system. This STIP ensures maximum benefits are received from available funding sources and that MnDOT will continue to work to provide a high quality and safe transportation system for Minnesota and support our vision of maximizing the health of people, the environment and our economy.

Any questions and comments on specific projects included in this program may be directed to the identified MnDOT District Office listed in the Program Listing sections of the STIP document. Please visit the Accessibility website (https://www.dot.state.mn.us/ada/contacts.html) to request the STIP document in an alternative format.

Thank you for your interest and support in Minnesota's Transportation System.

Sincerely,

Jean Wallace, P.E.
Deputy Commissioner &
Chief Engineer

Sara Severs
Deputy Commissioner &
Chief Administrative Officer

Nancy Daubenberger, P.E.
Commissioner

The 2026-2029 Minnesota State Transportation Improvement Program was recommended for approval by the Minnesota Department of Transportation's Program and Investment Committee (TP&IC).

PREFACE

This is the State of Minnesota State Transportation Improvement Program (STIP) for state fiscal years 2026-2029. It includes an introduction, or overview, of the anticipated expenditures for the different modes of transportation. The document is organized into three chapters and four appendices.

Chapter I is the introduction to MnDOT. It provides information on MnDOT's vision for its transpor-tation system and the factors that help shape MnDOT's policies and programs.

Chapter II is the formal response to the federal requirements for the STIP developed under the Federal Transportation Acts. The programming process to develop this STIP began in the fall of 2024 and was developed under the requirements outlined in IIJA with a conservative estimate of federal funds anticipated.

Chapter III includes the project listing, but not limited to, all projects using federal-aid highway or transit funding. These listings are organized by MnDOT District.

Appendix A includes a description, expenditure summary and project listing for several federal-aid highway and transit programs. A description of the MnDOT State Road Construction Program (SRC) is also included.

Appendix B provides information on the STIP investment summary and system performance outcomes.

Appendix C details the federal fiscal constraint plan for the STIP.

Appendix D provides a list of federal lands projects that were selected by the Eastern Federal Lands Highway Division.

This document is also available at: https://www.dot.state.mn.us/planning/program/stip.html.

CONTENTS

LETTER OF ENDORSEMENT

PREFACE

CHAPTER I: INTRODUCTION

CHAPTER II: STATE TRANSPORTATION IMPROVEMENT PROGRAM

CHAPTER III: PROJECT LISTS

APPENDIX A: HIGHWAY AND TRANSIT PROGRAMS

APPENDIX B: FEDERAL PERFORMANCE MEASURES AND TARGETS

APPENDIX C: MNDOT DETAILED FEDERAL FISCAL CONSTRAINT PLAN

APPENDIX D: FEDERAL LANDS PROGRAM

CHAPTER I: INTRODUCTION

A Transportation System for Access, Health, Environment, and Economy

The State of Minnesota operates a transportation system that includes aeronautics, highways, motor carriers, ports, public transit, and railroads. MnDOT is the principal agency in the state for development, implementation, administration, consolidation, and coordination of state transportation policies, plans, and programs. These policies, plans, and programs are developed in cooperation with the public and a variety of transportation partners, including the Twin Cities Metropolitan Council, seven greater Minnesota Metropolitan Planning Organizations (MPOs) established in areas with populations exceeding 50,000, nine Regional Development Commissions (RDCs), county, city, and Indian tribal governments throughout the state.

MnDOT envisions a multimodal transportation system maximizing the health of people, the environment and the economy. A transportation system that connects Minnesota's primary assets the people, natural resources, and businesses within the state to each other and to markets and resources outside the state and county. That provides safe, convenient, efficient, and effective movement of people and goods; and is flexible and nimble enough to adapt to changes in society, technology, the environment and the economy.

Several factors are shaping the development of MnDOT policies, plans, and programs. These include safety, the integration of transportation modes, service and investment preservation, customer focus, economic development, technology, environmental partnerships, and federal and state actions. This document addresses these factors and provides a multimodal focus. The investment in transportation infrastructure improvement is summarized in Figure 1. The total government investment in transportation infrastructure could be at a higher investment level and Figure 1 does not include expenditures for infrastructure maintenance and operation.

Figure 1: State Transportation Improvement Program Funding (Millions)

Program	2026	2027	2028	2029	Total
Highway Assistance Program	4,095	2,223	1,915	1,798	10,031
Transit Assistance Program	686	579	1,078	880	3,223
Rail Service Improvement Program	11	-	-	-	11
Port Development Assistance Program	7	9	7	2	25
Total	4,799	2,811	3,000	2,680	13,290

HIGHWAY ASSISTANCE PROGRAM

The Highway Assistance Program includes all federal aid for highways received through the Federal Highway Administration (FHWA) of the (USDOT). It includes all federal apportionment, allocation or special funding. It also includes all state trunk highway funds appropriated for construction, other state appropriated investments and any local funding utilized as match for federal projects. Funding for rail-highway safety is also incorporated in this program. The Program Listing definition is included on page III-1 of the STIP following with a list of projects sorted by MnDOT districts.

TRANSIT ASSISTANCE PROGRAM

The Transit Assistance Program includes all federal aid for transit received through the Federal Transit Administration (FTA) of the USDOT. It also includes all state and local funds necessary to match the federal funds and operate the transit systems. All transit projects are included in the STIP and an estimated funding summary is included in Appendix A-3.

RAIL SERVICE IMPROVEMENT PROGRAM

The Minnesota Rail Service Improvement Program (MRSI) was established in 1976 to prevent the loss of rail service on lines potentially subject to railroad abandonment. Projects that fall within the MRSI are divided among 6 programs: freight rail economic development grant program, rail line rehabilitation, capital improvements for railroads and rail shippers, purchase assistance to rail authorities, loan guarantees and state rail banking. The number of rail service assistance projects is estimated and shown in Appendix A-5.

PORT DEVELOPMENT ASSISTANCE PROGRAM

The Port Development Assistance Program was created in 1991. From 1996 to 2023 the Legislature has set aside a total of $72.3 million to fund this program. The total port development assistance program anticipated expenditures is included in Appendix A-7.

CHAPTER II:
STATE TRANSPORTATION IMPROVEMENT PROGRAM

Self-Certification

In accordance with 23 CFR § 450.220(a), the Minnesota Department of Transprtation (MnDOT), as the Governor's designee, certifies that the transportation planning process is being carried out in accordance with the following requirements:

(1) 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304, and this part;

(2) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;

(3) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;

(4) Section 1101(b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;

(5) 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;

(6) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;

(7) In States containing non-attainment and maintenance areas, sections 174 and 176(c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;

(8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;

(9) 23 U.S.C. 324, regarding the prohibition of discrimination based on gender; and

(10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

20 Year Minnesota State Highway Investment Plan

Projects in the STIP are consistent with the 20-Year State Highway Investment Plan (MnSHIP) and the Statewide Multimodal Transportation Plan (SMTP). MnSHIP addresses federal planning requirements, the transportation goals identified in state law, and reflects MnDOT's SMTP and the Minnesota GO 50-Year Statewide Vision. The process for developing and updating MnSHIP provides early and continuous opportunities for the involvement of the public and other potentially affected parties.

In accordance with Minnesota Statutes §174.03, Subdivision 1a, the SMTP is updated every 5 years. The SMTP update was completed in December 2022. MnSHIP is updated after the SMTP is completed and was last updated in February 2024.

MnDOT develops a 10-year Capital Highway Investment Plan (CHIP) to present MnDOT's planned capital state highway investments for the next ten years, which includes state highway projects in the four years listed within this STIP. The CHIP is updated annually and reflects the investment direction established in MnSHIP.

MnSHIP is available for download at the following web address: https://www.dot.state.mn.us/planning/mnship/

The CHIP is available for download at the following web address: https://www.dot.state.mn.us/planning/10yearplan/district-chip.html

Public Involvement

The last several Federal Transportation Acts have created less of a federal presence in many transportation decisions. The diminished federal role results in more state/local authority and responsibility for these decisions. The funding flexibility and expanded project eligibility under these acts has given deci-sion makers more options to address transportation priorities. Public involvement in transportation issues and decision making is vital because of this expand-ed eligibility and diversity. Federal Law requires an opportunity for early and continuous involvement in the development of the STIP. Public involvement is also a mandatory component of the MPO planning process.

Minnesota's transportation investment process with the Area Transportation Partnerships (ATPs) provides for early and continuous involvement in the development of the STIP. The process incorporates the public involvement activities of the partners (MPOs, RDCs, counties, cities, townships, and others) into their roles on the ATP. MPOs in accordance with federal requirements have developed public participation processes and use them in conjunction with the development of their Transportation Improvement Programs (TIPs). The MPO TIPs, as well as the MPO Public Involvement Plans (PIP) include detailed dis-cussion of public involvement.

In addition to the public input derived through Minnesota's transportation investment process, public meetings, forums, conferences and focus groups have been held throughout the state by ATP partners, MnDOT and modal partners such as transit, rail and bike/pedestrian.

Other methods used to encourage public involve-ment, and outreach included the use of newspaper articles, informational mailings, press releases, websites, and social media. A notice of the availability of the draft 2026-2029 STIP was posted on MnDOT's website and placed in the State Register on June 9, 2025, with a 30-calendar day review and comment period ending July 8, 2025 where comments were accepted on-line at: https://www.dot.state.mn.us/planning/program/stip.html.

The Metropolitan Council and its Transportation Advisory Board (TAB) make a concerted effort to ensure all interested and concerned parties are offered opportunities to participate in the preparation of the TIP for the Twin Cities metropolitan area. Public com-ment is solicited at public meetings and in a 45-day public comment period where comments are also accepted by email, phone, or mail. At the TAB's regu-lar public meeting on May 21, 2025, the TAB adopted the draft TIP for the purpose of public comment; the public comment period was from May 24, 2025 – July 7, 2025. Metropolitan Council made notifications by web announcement and web page notice, email, social media, newspaper advertisement, and an online public meeting. They reached out to groups representing a diverse set of stakeholders ranging from partner agencies, transit providers, and community-based organizations. The Council hosted an online public meeting with the Metropolitan Council Transportation Committee meeting on June 17, 2025, in which public comments were also solicited.

The Fargo-Moorhead Metropolitan Council of Governments (Metro COG), in cooperation with multiple planning partners, developed the Final Draft 2026-2029 TIP. The public was invited to a meeting to review the Final Draft of the TIP in person on September 2, 2025. The purpose of the meeting was to provide the public with an opportunity to participate in the development of the Final Draft 2026-2029 TIP for the Fargo-Moorhead Metropolitan Area. The public also provided comments on the Final Draft TIP to Metro COG, including Metro COG's TTC meeting on September 11, 2025, prior to the close of the public comment period on Monday, September 15, 2025. However, due to the volume of comments received, Metro COG continued to accept public comments up through the adoption of the Final 2026-2029 TIP by Metro COG's Policy Board on September 25, 2025.

Minnesota Transportation Process for Investment Decisions

The STIP is developed in accordance with the Guidance for the Development of the State Transportation Improvement Program published by MnDOT and with the memo on STIP Funding Guidance distributed to the Districts/ATPs on December 5, 2024. Minneso-ta's STIP is developed through a regional geographic model for making investment decisions.

The STIP Development process is driven by federal, state, local, and regional planning goals and objectives. Statewide investment goals have been drawn from statewide planning studies and policies, the Minnesota Statewide Transportation Plan, and an analysis of previous programs. They are offered as an aid in determining area wide priorities. The process builds on the plans and priorities established by MnDOT Districts, MPOs, cities, counties, townships and RDCs.

The investment process uses eight regional partnerships whose boundaries are based on county boundaries that align with MnDOT's State Aid Districts. These Area Transportation Partnerships (ATPs) comprise a diverse membership encompassing both traditional and non-traditional, metropolitan and non-metropolitan stakeholders and can include MPOs, RDCs, cities, counties, townships, transit pro-viders, tribal governments, other interests, and Mn-DOT. The ATPs integrate the state and local priorities within their region and recommend a minimum four-year program for federally funded transportation investments. This four-year program, when combined with a list of state highway funded projects is con-sidered the draft Area Transportation Improvement Program (ATIP). Each draft ATIP includes a prioritized list of projects that aid in solving transportation problems and implementing the long-range objectives for the area.

Balanced investment decisions promote effective and efficient transportation. Safety is a key element of all investments. The principal investment emphasis is preservation and operational improvements in the existing transportation system. The draft ATIP prepared by each ATP is submitted for inclusion in the draft State Transportation improvement Program (STIP). Project cost estimates include an adjustment for inflation of approximately 4 percent. The ATIPs are analyzed and compared to statewide goals and objectives set by MnSHIP, and unique transportation needs. From this, a draft STIP is developed.

The draft STIP is an initial selection of projects made from the list of projects within the draft ATIPs. MnDOT reserves the right to select projects for the first year of the STIP from the projects in the last three years of the STIP. This includes an analysis of preferred project funding sources, alignment with MnSHIP investment direction, and adherence to fiscal constraint. The draft STIP is widely circulated for internal review and comment prior to final adjustments. It spans four state fiscal years and includes all state and local projects funded through federal highway and transit assistance and includes other regionally significant projects.

The draft STIP is released for public review and comment, which is recirculated to the Districts and ATPs for documentation, feedback, and further review. Based on input received during this period, revisions are made to the draft. The updated STIP is then submitted to the Commissioner's staff for final review and approval before being forwarded to the Feder-al Highway Administration (FHWA) and the Federal Transit Administration (FTA).

The final STIP is reviewed and approved by FHWA and FTA prior to any expenditure of federal funds. Upon approval, the document will be used by each ATP as a starting point in the process for developing their next ATIP.

Project Selection

In 2017, the Minnesota Legislature directed the Minnesota Department of Transportation to develop and implement a new transparent and objective policy for the selection of state highway construction projects. The new project selection policy (MnDOT Policy OP016) applies to the selection of state highway construction projects in the STIP as well as the 10 Year Capital Highway Investment Plan. The new project selection policy was implemented with the 2020-2023 State Transportation Improvement Program (STIP) and 2020 2029 Capital Highway Investment Plan (CHIP).

MnDOT uses objective criteria to assign numeric scores in all selection processes subject to this policy. The list below indicates categories and programs within which projects have been selected for inclusion in the STIP. The category and score are listed in the STIP for projects subject to the policy. The numeric scores inform project selection decisions, but MnDOT may consider other factors in addition to the numeric score when making final selection decisions. When MnDOT does not select a high scoring project or selects a lower scoring project, MnDOT will provide a short explanation for the reasoning behind the decision in addition to the project score. The list of projects selected and those considered but not selected, criteria, scores and reasoning behind deci-sions are posted online at: http://www.dot.state.mn.us/projectselection/

Project Selection Categories Include:

- Pavement
  - National Highway System
  - Non-National Highway System
  - Urban Roadways
- Bridge
  - National Highway system
  - Non-National Highway system
  - Culverts (NHS and non-NHS)
  - Railroad over State Highways
  - Pedestrian and Bicycle bridges and underpasses
- Non-Motorized
  - Replacement and rehabilitation of MnDOT owned sidewalks and trails
- Metro and Greater MN Mobility and Capacity Expansion projects
- Statewide standalone proactive and reactive safety projects
- Statewide standalone bicycle and pedestrian infrastructure projects
- Specialty and competitive programs
  - Corridors of Commerce
  - MN Highway Freight program
  - Highway Safety Improvement program (HSIP)
  - Intelligent Transportation Systems (ITS)
  - Local Partnership Program (LPP)
  - Railway-Highway Grade Crossing Program
  - Safety Rest Area
  - Standalone Noise Barrier
  - Transportation Economic Development (TED)
  - Weigh Station Capital Improvement Program

Financial Plan

As mentioned in the Preface of this document, this STIP is a formal response to federal requirements. The STIP financial plan addresses fiscal constraint requirements. The principal financial assumption is the funding of the federal program as authorized by IIJA. All projects in the 2026-2029 STIP are deemed acceptable for implementation under these reasonable financial assumptions. The financial constraint requirements under IIJA are deemed to be sufficiently flexible to permit the selection of projects from the second through fourth year of the STIP to replace projects selected for the first year of the STIP. MnDOT reserves the right to make project selection adjust-ments for the ATPs from within the STIP. MnDOT has implemented four financial policies that have ap-plied to the program for several years. These policies include Fund Balance, Cash Balance, Advance Con-struction, and Debt Management.

Federal Funding

IIJA requires that the federal-aid highway and federal aid transit projects in the STIP be based on financing reasonably expected to be available. The 2026-2029 STIP is based on anticipated federal, state and local funds. The federal-aid revenues are based on estimates of formula apportionment.

Federal-Aid Highway Formula Funding

Federal-aid highway formula funding is apportioned to the states by formulas established in law. Federal aid highway apportionments have been highly variable. Minnesota developed this STIP based on a forecast estimate for obligation authority. Under IIJA, the federal-aid highway obligation authority estimate for the development of this STIP is approximately $857, $847, $901, and $901 million for fiscal years 2026 through 2029, respectively.

Federal-Aid Highway Transfers of Funding

Flexing of Congestion Mitigation Air Quality and Surface Transportation Program funding is estimated at $48 million in 2026, $10 million in 2027, $8 million in 2028. These funds are transferred to Federal Transit Administration (FTA) for the acquisition of transit buses. In addition, funds are transferred for Research projects which Minnesota participates in, but MnDOT is not the lead Agency.

Federal-Aid Highway Allocation Funding

Funding available from allocations is included in the STIP. Federal-aid highway allocation funding is distributed to the states by administrative formula or by means of a competitive application. Allocated funds include many varied categories of federal aid, including, but not limited to Public Lands, Indian Reservation Roads, Federal Lands Access.

Projects with allocated funding are routinely added to the STIP, but due to the timing of project identification, projects may require amendments or modifications to be processed.

Congressionally Directed Spending/Community Project Congressionally Directed Spending/ Community Project Funding

Some federal highway funds come to Minnesota through a process called Congressionally Directed Spending or Community Project Funding, both formally called “earmarking”, which is the legislative assignment of funds for specific projects. Most federal funding requires a “match” of state or local funds. Earmarked funding is subject to obligation limitation but is available until spent. Due to project delivery schedules and the rules pertaining to the spending of these funds, the actual level of funding committed each year may vary. To date, most of Earmarked fund-ing has been spent and projects have been closed out providing the uncommitted funds to be re-purposed. IIJA does not provide Earmark funding.

IIJA Discretionary Grants

Many organizations around the state of Minnesota now have the opportunity to compete for various discretionary grant programs created under IIJA. IIJA grant programs cover a wide range of initiatives and projects which includes, but not limited to, Rebuild-ing American Infrastructure with Sustainability and Equity (RAISE), Bridge Infrastructure, Carbon Reduction, Charging and Fueling Infrastructure, Electric Vehicle Infrastructure, Resiliency, and Safety Streets for All.

Federal Transit Funding

Federal transit funding includes an urbanized area formula program, a non-urbanized area (rural, small urban and intercity bus) formula program, an elderly and persons with disabilities formula program and a capital formula program. Much of the transit program is based on grant applications. In the past, the actual flow of funding has varied. The passage of IIJA and its provisions to guarantee funding for transit programs allows predictability of federal transit funds; however, fed-eral funds make up only a small percentage of total operating costs for the small urbanized and rural programs.

State Highway and Transit Funding

The State of Minnesota has a biennial budget. State agency programs and operating budgets are based on a balanced budget. The 2026-2029 STIP is based on two years of approved funding and two years of estimated funding. The State Highway funding level for the STIP is estimated to be approximately the same for all 4 years of the STIP.

State Highway Funding

Funding is expected to average about $475 million per year from 2026 through 2029 based on existing revenue sources. The Trunk Highway Fund’s current and projected cash balances also permit advance constructing federal projects prior to actual federal dollars being available. Minnesota is confident it can match federal funds currently forecasted during the STIP 2026-2029 period. Shall additional Federal Funds become available during this time period, MnDOT has state Trunk Highway and Federal County Road and Bridge budget authority available to utilize these funds. Minnesota may use its federal funds for things such as Right of Way, Preliminary Engineering, and Construction Engineering in which Minnesota has historically used state funding.

State Transit Funding

The amount of service that Minnesota transit systems can provide is closely tied to the amount of funding provided by the state. The Minnesota Legislature decides on the funding levels for the state’s Public Transit Participation Program in Greater Minnesota and the Met Council in the Twin Cities Metropolitan Area every two years. Transit assistance comes from two primary sources, General Fund and Motor Vehicle Sales Tax (MVST).

In Greater Minnesota public transit providers apply annually for operating, capital and planning activities. The transit appropriation from the State Gen-eral Fund for Greater Minnesota is approximately $18.2 million in FY 2024 and each year thereafter. An additional source of funding for Greater Minnesota Transit is the sales tax on motor vehicle leases, added in the laws of 2008, chapter 152, and later amended. In FY 2017, the Legislature changed the formula for sales tax on leases: beginning in FY 2018, it was distributed 38% to the Greater Minnesota transit account, 38% County State Aid Highway fund, 13% to the Minnesota state transportation fund for local bridges, and 11% to the Highway User Tax Distribu-tion fund. The MVLST amount for Greater Minnesota Transit was approximately $28 million in 2024 and is forecast to be approximately $28 million in future years.

The transit appropriation from the State General Fund for the Twin Cities Metropolitan Area was $141.6 million in FY2024 and is $88.6 million in future years. A Constitutional Amendment passed in 2007 allocates a minimum of 40% of MVST revenues to transit purposes. Amended in the FY2023 legislative season, the 40% is split 5.7% for Greater Minne-sota Transit and 34.3% for Metropolitan Area Transit. Total transit funds in the Transit Assistance Fund (MVST and MVLST) were approximately $65 million in 2025, increasing to $83 million in 2029 for Greater Minnesota and $394 million in 2025 increasing to $499 million in 2029 for the Metro Area.

Local Highway and Transit Funding

Local funding is assumed to be available to match, or over-match, the federal aid for highways and transit. The state and local funding is also expected to be sufficient to maintain and operate the highway and transit systems.

Local Highway Funding

The State has a dedicated fund for state-aid roads and bridges for counties and cities of 5,000 and over in population. The funding is available for maintenance and construction and is used in part to maintain the federal-aid highways and to match federal-aid. The local highway funding committed to match the federal highway aid is expected to average about $244 million per year.

Local Transit Funding

Most of the funding for the Minneapolis St. Paul large-urbanized area transit system is provided through local and state revenues. Since transit is substantially a local program, estimates of urbanized transit system funding are based on the MPO TIPs. Small urban and rural transit systems have a portion of their funding provided by assistance from the State General Fund. The local funds may be from a variety of sources.

Advance Construction

Federal law allows states to request and receive approval to construct Federal-aid projects prior to receiving apportionment or obligation authority for the Federal-aid funds using Advanced Construction (AC). This means that Minnesota may commit future federal funds to a project through the normal FHWA approval and authorization process. An AC project is treated the same as any other federal project and must be authorized prior to advertising for letting or expending any funds on the project. Projects using AC must be fully encumbered in the state MnDOT budget for the amount of state funds and the federal AC amount. AC is available to local governments as well as MnDOT.

The agency that uses the AC procedure must "front end" the project with their own funds. These may be state aid funds, local tax funds, State Road Construction funds or some other appropriate funding sources. Local projects utilizing AC funds require a special agreement approved by MnDOT's Division of State Aid.

Federal regulations require that AC be shown in the year incurred and that the conversion of AC be shown in each year in which conversion takes place. Conversion is the process of converting AC to the obligation of actual federal funds. In the project listings in this STIP, AC funding is shown in a separate column, and the dollar amounts are not included in the "Total" column. However, the AC conversion dollar amounts are included in the "FHWA" column and the "Total" column in the year in which a project is converted.

See Appendix C for MnDOT's Detailed Federal Fiscal Constraint Plan.

Figure 2
State Transportation Improvement Program Funding (Millions)

Source	2026	2027	2028	2029	Total
FTA Funds	353	318	390	293	1,354

Total	4,780	2,803	2,994	2,678	13,255

Figure 2 is a summary of the proposed expenditures in the STIP by fiscal year and the proposed source of federal highway, transit, state trunk highway and other sources of local funding.

Figure 3 is a summary of the proposed expenditures in the STIP by fiscal year and ATP.

CHAPTER III: PROJECT LISTS

The following section contains all projects in the 2026-2029 STIP. The map shows each District/ATP location within the state and the counties included within each District/ATP. Within each Fiscal Year, projects are sorted by transit project first, followed by rail, local roadway, state project, and setasides.

FIGURE 5: ROUTE SYSTEM

Route System	Definition
COUNTYWIDE	Throught-out the County
HIGHWAY CR	County Road Highway
HIGHWAY CSAH	County State Aid Highway
HIGHWAY I	Interstate System
HIGHWAY MN	MN Highway System
HIGHWAY MSAS	Municipal State Aid Street
HIGHWAY US	United State Highway
HIGHWAY 999	Districtwide Highway
LOCAL STREETS	Local
REC TRAIL	DNR Recreational Trail
RR	Railroad
STATEWIDE	MnDOT Statewide
ED/BIKE	Pedestrian or Bike Path
TRANSIT	Transit

FIGURE 4: PROJECT COLUMN HEADER

Project Column Heading	Definitions
SEQ#	The sequence number is a unique number assigned to each project in this project listing
CHIMES PROJECT NUMBER	CHIMES project identification number
DISTRICT	The district the project resides in
ROUTE SYSTEM	the route name and number where the project is located
STIP PROJECT NUMBER (SP)	Project identifier. Most trunk highway projects start with the control section numbers. Local projects start with either the county number or the city number
YEAR	The year of the project
AGENCY	The jurisdiction responsible for implementing projects or for opening bids
TECHNICAL PROJECT DESCRIPTION	The location, scope, and work description
MILE	The length of the project
SECONDARY WORK TYPE	Indicate the specific type of work being done to the project
FUND TYPE	Preliminary funds assignment with exact determination of funding determined upon authorization
STIP TOTAL	The total estimated cost of the project relative to federal funding to be used in the year of the letting. This includes advance construction (AC) conversion funding. It does not include the original advance construction funding
TOTAL FHWA	The total estimated federal aid highway funding to be used for the project. This includes advance construction conversion funding
TOTAL AC	The total estimated amount of future federal funds (AC) being committed to a project, front-ended by local/state funds
FTA	The total estimated federal aid transit funding used on the project
TOTAL TH	The total estimated state trunk highway funding used on the project
BOND	The total estimated state bonds to be used for the project
OTHER	Estimate of funding other than FHWA, FTA or State TH to be used for the project. This includes local match, local funds, private contributions and special legislative appropriations
PROJECT SELECTION CATEGORY	Categories or programs within which projects have been selected subject to the Project Selection requirement
PROJECT SELECTION SCORE	Numeric score assigned subject to Project Selection requirements

FIGURE 6: SMART CODE

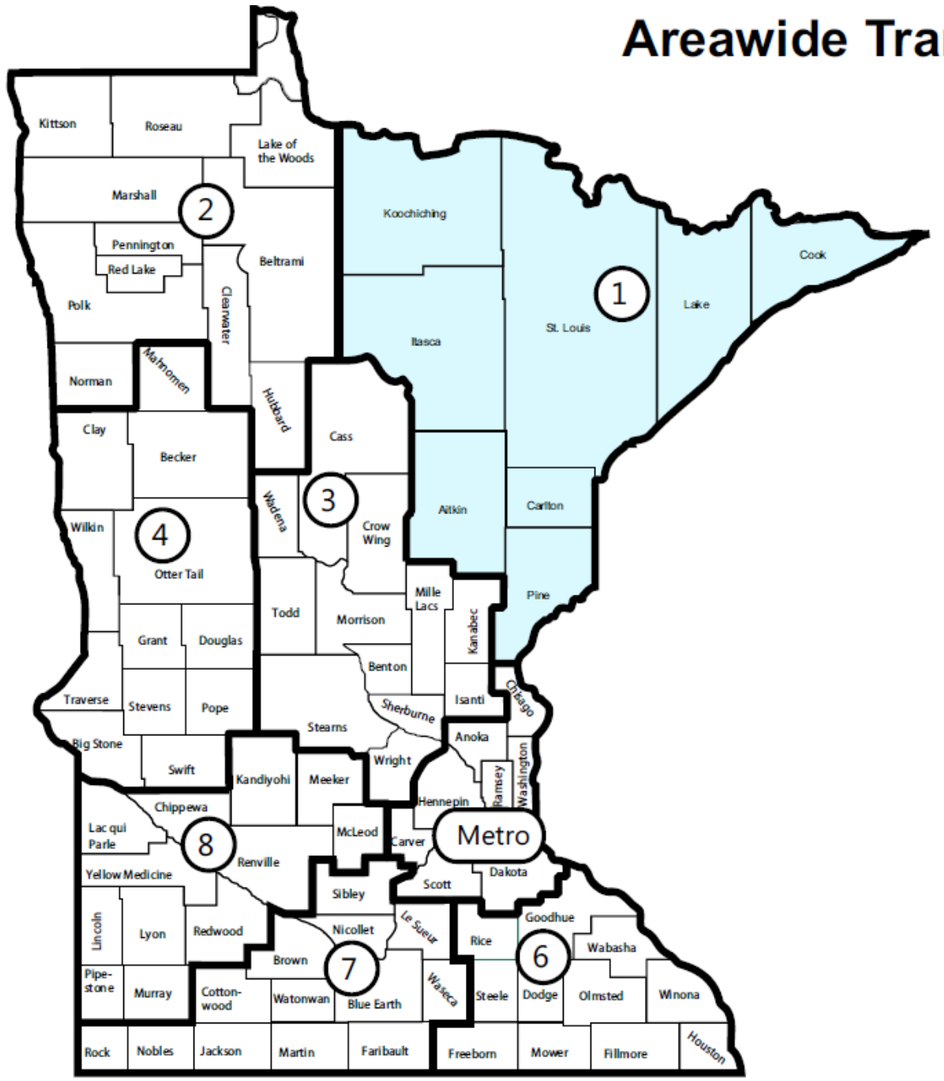

Smart Code	Definition
AC	Advance Construction
BFP	Bridge Formula Program
BIP	Bridge Improvement Program (Grants)
BLATNIK	Blatnik Bridge Project

Appendix A: Highway and Transit Programs

Greater MN MPO Programs

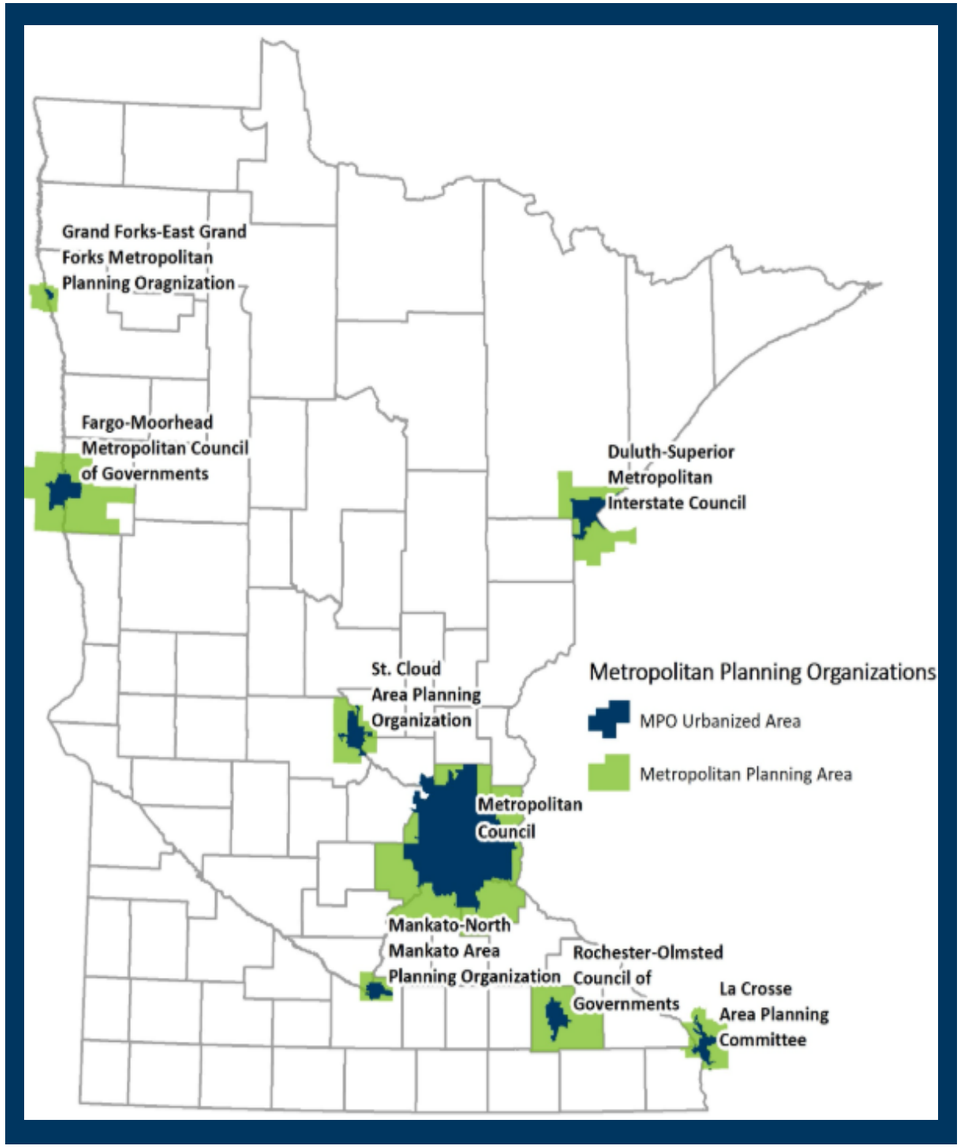

In accordance with the joint FHWA/FTA Metropolitan Planning Rules, 23 CFR Section 450.326, each of the Metropolitan Planning Organizations in Greater Minnesota has developed and approved a four-year fiscally constrained Transportation Improvement Program (TIP). Each TIP provides a list of projects for which federal (FHWA and FTA), state (MnDOT) and in some cases, local funds are anticipated to be used. The federally funded projects have been selected through the MPO and/or Area Transportation Partnership (ATP) process and are included in the appropriate Area Transportation Improvement Pro-gram (ATIP).

Also included in the MPO TIP is a financial plan which discusses the program's fiscal constraint, a description of the anticipated effect of the TIP toward achieving the MPO's performance targets, and the MPO's certification that the MPO planning process is being carried out in compliance with all applicable federal requirements.

After adoption by the MPO and approval from MnDOT as the Governor's designee, the MPO TIP is incorporated by reference, without modification, into the STIP. Additionally, the federal and state (MnDOT) funded projects within the MPO area are listed in the STIP.

Highway Safety Improvement Program

The Highway Safety Improvement Program (HSIP) is a core Federal-aid program. The goal of the program is to achieve a significant reduction in traffic fatalities and serious injuries on all public roads. HSIP requires a data driven, strategic approach to improve highway safety. HSIP goals for each district and ATP are determined by fatal and serious injury crashes. HSIP funds are managed at the statewide level by the Office of Traffic Engineering (OTE) and by the Office of Transportation System Management (OTSM).

MnDOT projects were selected for the 2026-2029 STIP through a centralized process. Three separate solicitations were held for (1) Greater Minnesota local projects, (2) Greater Minnesota District projects and (3) Metro projects. Low cost, systematic projects were prioritized over reactive single location improvements. Examples of funded projects: intersection lighting, enhanced edge lines, rumble strips, chevrons on curves and cable median barrier. All state and local HSIP projects must be approved by the Office of Traffic Engineering (OTE) before they are included in the STIP.

Projects were selected using the following criteria:

- Developed in a Road Safety Plan
- Systemic risk factors for fatal and serious injury crashes
- Sustained crash history, e.g., critical crash rate
- Benefit-cost ratio calculation
- Motor vehicle traffic volume (ADT)
- Pedestrian and bicycle safety elements

For Greater Minnesota local projects, the selection committee was comprised of:

- MnDOT Office of Traffic Engineering (3)
- MnDOT Office of State Aid for Local Transportation (2)

For Greater Minnesota District projects, the selection committee was comprised of:

- MnDOT Office of Traffic Engineering (1)
- District Traffic Engineering (2)
- District Leadership (1)
- District Planning (1)

For Metro ATP projects, the selection committee was comprised of:

- MnDOT Office of Traffic Engineering (1)
- Metro District Traffic Engineering (2)
- County and/or City Engineering (2)
- Metropolitan Council Regional Planning (1)

Highway Freight Program

The Minnesota National Highway Freight Program (NHFP) is a federally funded program designed to improve freight safety, mobility, intermodal facilities and first and last mile connections to key destinations. Minnesota Highway Freight Program goals include infrastructure and operational improvements to U.S. highways, and improving safety, security, efficiency and resiliency of freight transport. Funding for the Minnesota Highway Freight Program comes from the federal NHFP fund and state Trunk Highway fund that provide state support to make freight improvements. Freight improvements that are funded align with the investment direction in the State Freight Plan which can be found at: https://minnesotago.org/final-plans/state-freight-plan.

NHFP funds are managed at the statewide level by the Office of Freight & Commercial Vehicle Operations (OFCVO) and the Office of Transportation System Management (OTSM).

Freight projects were selected for the 2026-2029 STIP through solicitation process. Minnesota cities, counties, metropolitan planning organizations, tribal governments, ports, airports, railroads and others may apply for funding for roadway, railroad safety, port and intermodal projects that benefit freight throughout the state. Some examples of freight projects that may be funded through the program are:

- Railroad at-grade crossing improvements
- Truck parking
- Weigh station improvements
- Freight mobility projects, such as interchanges or bypass lanes to address freight bottlenecks
- Improving access to freight-generating facilities or industrial areas
- Intermodal projects, such as airport or other transfer stations and ports and waterways

The table below shows investment level for the Highway Freight Program in the 2026-2029 STIP.

Bridge Formula Program

IIJA created a new national program called the Bridge Formula Program (BFP). The program focuses on modernize bridges to withstand the effects of climate change and to make them safer for all users, including cyclists and pedestrians. It provides funding to repair, replace, rehabilitate, preserve, protect, and construct highway bridges. The Bridge Formula Program also offers funding for “off-system” bridges, generally referring to locally owned bridges not located on the federal highway system.

Bridge Formula Program funds are managed at the statewide level by the Bridge Office and the Office of Transportation System Management (OTSM).

State BFP bridge projects were prioritized and selected for the 2026-2029 STIP through a centralized process performed by MnDOT Bridge Office. The goal is to build, preserve, and maintain Minnesota’s bridges and structures through out the state. Local "off-system" bridge project were selected by MnDOT State Aid Office.

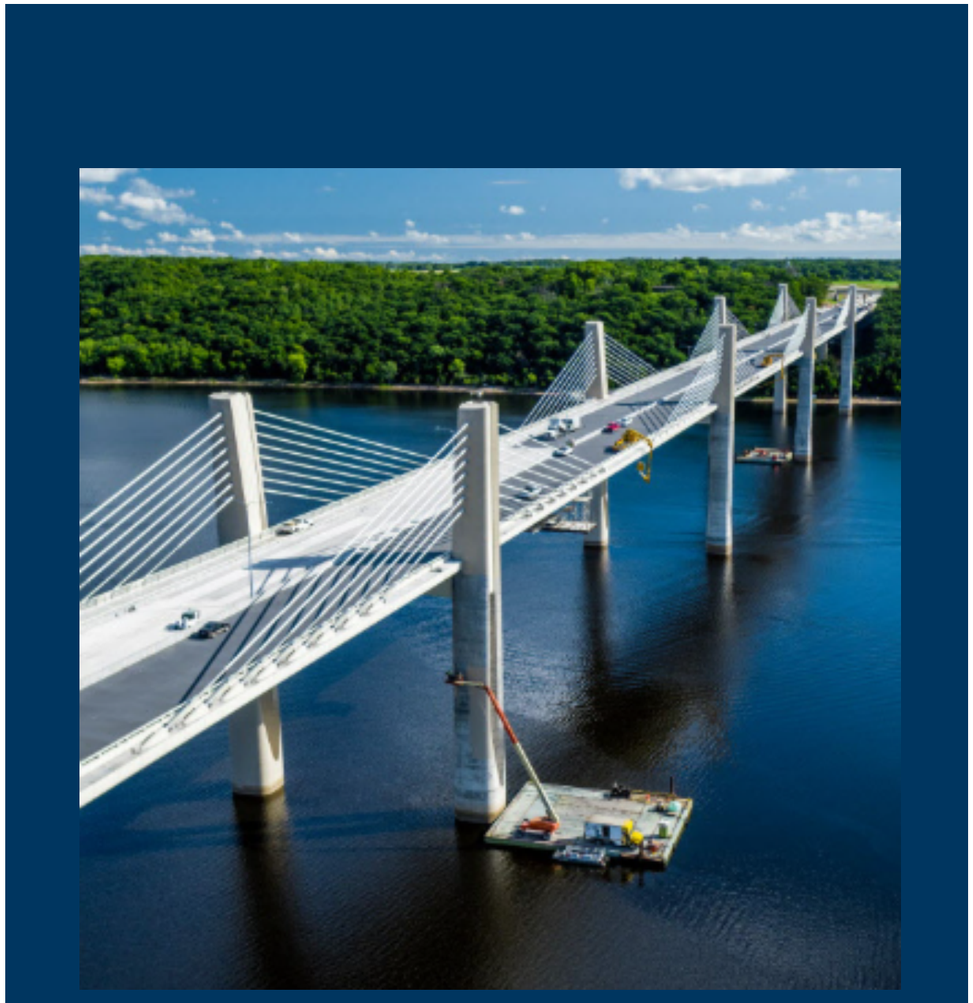

The table below shows investment level for the Bridge Formula Program in the 2026-2029 STIP.

Figure A2(C): Bridge Formula Program (BFP) Funding By Year (Millions)

Carbon Reduction Program

The Carbon Reduction Program (CRP) is a new program created by IIJA. The purpose of the program is to reduce carbon dioxide emissions from on-road highway sources. To use the Carbon Reduction Program funds, Minnesota must select and program eligible projects. This requires teamwork, coordination and cooperation at all levels of government.

For FY 2026-2029, MnDOT programmed $81 million of CRP projects in the STIP. Program funding was distributed across the state, with some funds allocated proportionally based on population. MnDOT Districts, MPOs, and ATPs select projects to receive CRP funding.

Areas that receive funding use a consistent set of criteria and scoring techniques to support prioritization and selection of projects. While the primary intent of the CRP is to advance projects that reduce carbon from the surface transportation sector, the Minnesota Carbon Reduction Strategy (CRS) also advances goals of equity, safety, transportation access and public health.

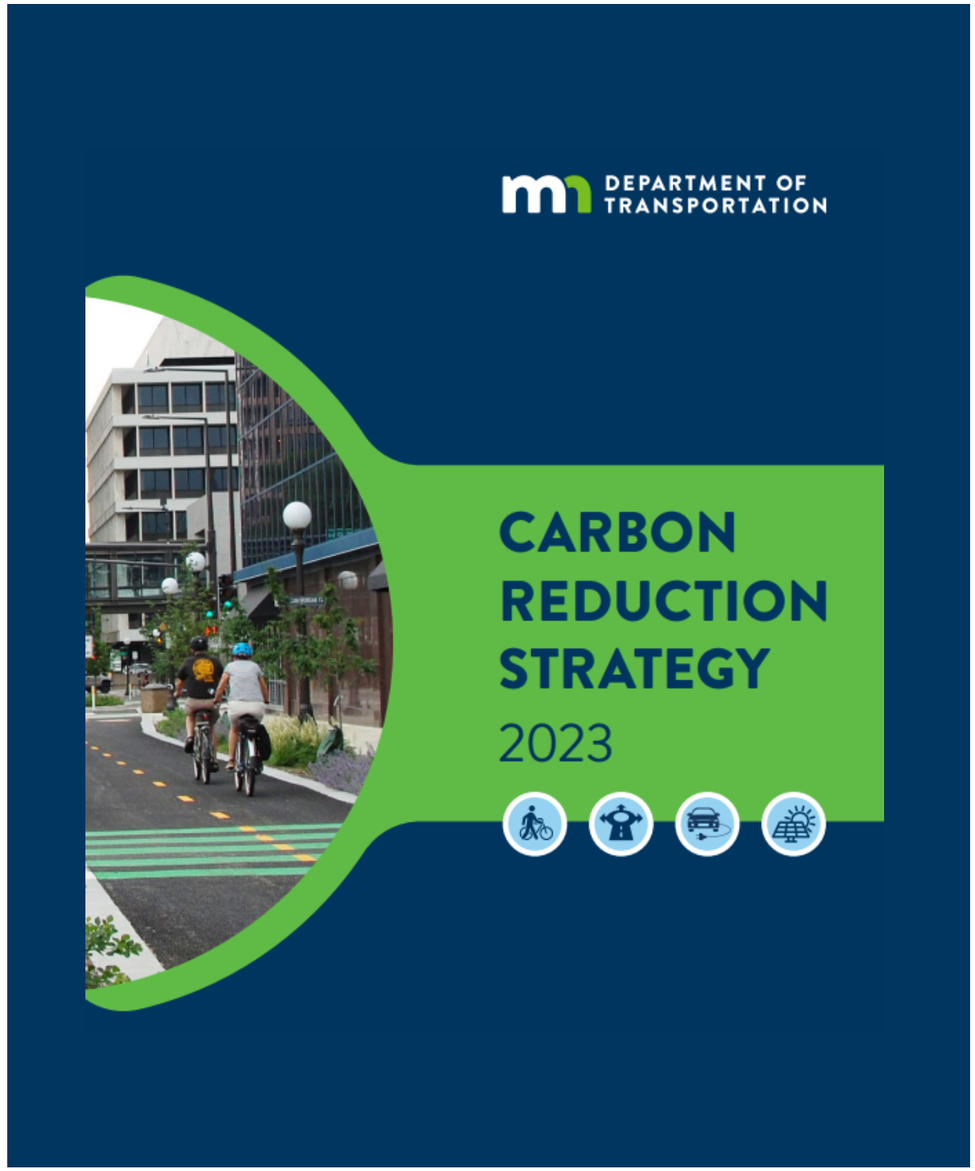

The table below shows investment level for the Carbon Reduction Program in the 2026-2029 STIP.

Figure A2(D): Carbon Reduction Program (CRP) Funding By Year (Millions)

Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation Program (PROTECT)

IIJA establishes the Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Formula Program to help make surface transportation more resilient to natural hazards, including climate change, sea level rise, flooding, extreme weather events, and other natural disasters through support of planning activities, resilience improvements, community resilience and evacuation routes, and at-risk costal infrastructure.

For FY 2026-2029, MnDOT programmed $104M of PROTECT projects in the STIP. Seventy percent of the funding was distributed to MnDOT Districts for resilience improvements to the Trunk Highway System and thirty percent to the ATPs for resilience improvements to the local roads.

PROTECT projects were selected through a solicitation process. State, MPOs, and local governments are eligible to apply for PROTECT funding. Eligible projects must address resilience to at least one of the seven climate hazards outlined in the Minnesota Resilience Improvement Plan (RIP) which includes:

- Heavy precipitation and flooding
- Extreme temperatures
- Freeze-thaw changes
- Abnormal winter weather
- Wildfire
- Landslides
- Coastal erosion (along Lake Superior's north shore)

The table below shows investment level for the PROTECT Program in the 2026-2029 STIP.

Figure A2(E): PROTECT Funding By Year (Millions)

PROTECT					
Source	**2026**	**2027**	**2028**	**2029**	**Total**
FHWA Funds	16.5	30.2	29.1	27.9	103.7

National Electric Vehicle Infrastructure Program (NEVI)

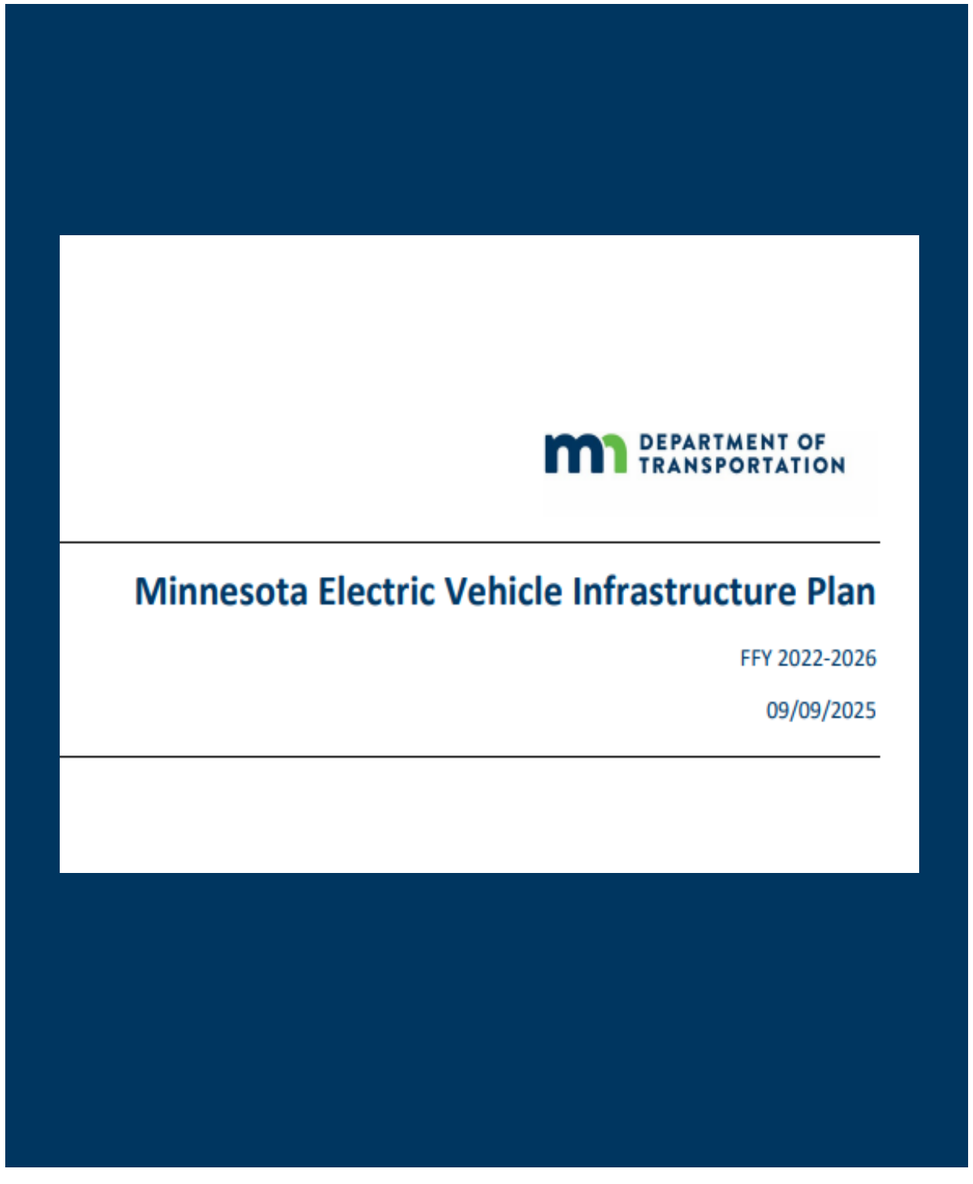

The National Electric Vehicle Infrastructure (NEVI) Program provides funds to states to build a convenient, affordable, reliable, and equitable fast charging network for electrical vehicles across the United States. MnDOT is responsible for administering the NEVI program and funding in the state of Minnesota.

Minnesota received approximately $56 million dollars in federal funds from the NEVI formula program in State Fiscal Year 2026. These federal funds are for developing and installing fast chargers for electric vehicles along designated corridors. The program aims to provide reliable, long-distance electric vehicle travel, while recognizing the unique needs of different regions and communities.

Private or public entities are eligible to apply for NEVI funds. Successful applicants will be required to enter a contract with MnDOT. The project team must include an experienced charging network provider and an entity with ownership or lease of the property through the five-year operations and maintenance period. Program requirement includes:

- Stations located no more than 50 miles apart along the Alternative Fuel Corridor.
- Stations located less than one mile driving distance from the Alternative Fuel Corridor Exit.
- Stations have a minimum of four 150 kW charging ports able to operate simultaneously.
- Stations are open to the public 24 hours a day, seven days a week.

NEVI funding are distributed to MnDOT Districts and ATPs. The Districts/ATPs, in coordination with MnDOT Office of Sustainability and Public Health (OSPH), selected projects to be included in the 2026-2029 STIP.

The table below shows investment level for the National Electric Vehicle Infrastructure Program in the 2026-2029 STIP.

Transit Programs

Federal Transit Administration (FTA)

A portion of the federal gas tax is placed in the Mass Transit Account of the Federal Highway Trust Fund. These funds are reserved for transit purposes and are managed by the FTA. Transit funding authorized by IIJA is managed in several different ways. Some transit funding is distributed by formula or grant application, and some is allocated to the states and/or transit authorities by FTA.

In Minnesota, FTA transit allocations for rural and small urban transit capital and operating assistance are managed by MnDOT's Office of Transit. These formula programs include the Enhanced Mobility of Seniors and Individuals with Disabilities Program and the Rural Area Formula Program. The Urbanized Area Formula Program (capital and operating assistance for urbanized areas with populations over 50,000) is provided directly to the urbanized area transit agency by FTA. In addition, FTA directly allocates Bus and Bus Facilities Formula Program funds to the states and/or transit agencies in urbanized areas for major capital needs such as fleet replacement and construction of transit facilities. Transit program includes:

- Public Transit Urbanized Area Formula Program (Section 5307)
- Capital Program (Section 5309)
- Elderly and Persons with Disabilities Program (Section 5310)
- Public Transit Non - Urbanized Area Formula Program (Section 5311) Inter-City Bus Program (Section 5311(f))

State of Good Repair (Section 5337)

- Bus and Bus Facilities (Section 5339/Section 5339(b)/Sec tion5339(c)

Federal Highway Administration (FHWA

An investment in transit capital is eligible for federal highway funding under IIJA through the Surface Transportation Block Grant Program (STBGP) or Congestion Mitigation and Air Quality (CMAQ).

Tribal Transportation Program

The Tribal Transportation Program (TTP) is co ad-ministered by the Federal Highway Administration's Office of Federal Lands Highway and the Department of the Interior's Bureau of Indian Affairs (BIA). The Indian tribal government, in cooperation with the BIA or FHWA, (and any state or local government, or metropolitan planning organization as may be ap-propriate), develops a Transportation Improvement Program (TIP) that includes all TTP eligible projects and activities on which the Tribe intends to expend its TTP funds. The TTP TIP is approved by FHWA.

After approval, the TTP TIP is forwarded by FHWA to MnDOT for incorporation into the State Transportation Improvement Program (STIP). The list of approved TTP TIP projects are listed on the following pages: https://highways.dot.gov/federal-lands/tribal/planning/ttp-stip-minnesota.pdf

Federally recognized Indian Tribes in Minnesota are:

- White Earth Nation
- Bois Forte Band of Chippewa
- Grand Portage Band of Lake Superior Chippewa
- Red Lake Band of Chippewa
- Fond du Lac Band of Lake Superior Chippewa
- Leech Lake Band of Ojibwe
- Mille Lacs Band of Ojibwe
- Prairie Island Indian Community
- Lower Sioux Indian Community
- Upper Sioux Community
- Shakopee Mdewakanton Sioux Community

Recreational Trails Program

The Recreational Trails Program provides funds to develop, maintain, and enhance recreational trails for both motorized and non-motorized recreational trail users. Funds are appropriated to the State by formula, 50 percent equally among all eligible states and 50 percent in proportion to the amount of non-highway recreational fuel use. The maximum federal share in Minnesota is 75 percent for these projects, and a 25 percent cash or pre-approved in-kind match is required. Only state agencies, cities, counties, townships, tribal governments or private trail organiza-tions sponsored by a local unit of government are eligible to apply.

The Minnesota Department of Natural Resources (MNDNR) administers this program for Minnesota. The Minnesota Recreational Trail Users Advisory Board (MRTUA) assists the MNDNR in project selec-tions. The committee is comprised of three represen-tatives of the ten identified trail user groups (bike, mountain bike, hike, ski, horse, in-line skate, ATV, Off Road Vehicles, snowmobiles, Off-Highway Motor cycling) in Minnesota.

The Recreational Trails Program projects are listed on the following pages: https://www.dnr.state.mn.us/grants/recreation/trails_federal.html

MN Rail Service Improvement Program

The Minnesota Rail Service Improvement Program (MRSI), established in 1976, helps prevent the loss of rail service on lines potentially subject to abandonment by railroads. Using state-developed eligibility rules, the state and rail users and/or railroads enter into contracts for rail line rehabilitation, capital improvements, pur-chase assistance to rail authorities, loan guarantees and state rail banking. This program provides funding for projects in the form of loans and grants. Loan repayments are returned to the Minnesota Rail Service Improve-ment Program account to fund future rehabilitation projects.

Using state developed eligibility rules, the state and rail users enter into grant contracts with railroads for rail line rehabilitation or contractors for other rail service improvements.

Projects fall within the program areas identified below. The MRSI Program identified $22 million in railroad track project needs in its most recent solicitation (2023). A new solicitation is expected to be held, to include $1M in newly appropriated bond funds, in 2025. Projects will move ahead if funding is available, and project agreements can be completed and contracts executed. These projects are typically funded with state general obligation bond funds or state general funds. Figure A 5 at the end of this section identifies the potential num-ber of projects and funding.

The following six programs are funded under the Minnesota Rail Service Improvement Program.

Freight Rail Economic Development Grant Program
Provides grants to railroads, shippers, local govern-ments, and other qualified applicants for eligible public or privately owned freight rail projects that both improve rail service and demonstrate a clear tie to economic development.

R**ail Purchase Assistance Program**
Assists Regional Railroad Authorities in acquiring rail lines that can be operated on a self-sustaining basis to provide local rail service. MnDOT may provide up to 50 percent of the value of the property. State funds are secured and require repayment if the line is sold or ceases to serve the purpose intended.

Rail Rehabilitation Loan Program
Provides low and no-interest loans to rehabilitate and preserve rail lines that are financially viable and have the potential to increase rail use. A shipper's sur-vey, cost/benefit analysis, and a rehabilitation need assessment are conducted to determine which lines are prospective rail projects. Repayment of loans is required.

Capital Improvement Loan Program
Provides rail users and railroads with loans for proj-ects that improve rail service and/or strengthen the financial condition of the associated line. Eligible projects have typically included capital improvements such as building and expanding industrial spurs, upgrading bridges and building more efficient load-ing/un-loading facilities. Repayment of loans is on a quarterly basis.

Rail User and Rail Carrier Loan Guarantee Program
Assists rail users in obtaining loans for rail rehabilita-tion and capital improvements by guaranteeing up to 90 percent of the loan. The 1994 Legislature further amended the statute, recreating the program as the Rail User and Rail Carrier Loan Guarantee Program. Not only rail users but rail carriers are eligible for assistance under the program. In addition to rail line rehabilitation, rolling stock acquisition and installa-tion are eligible.

State Rail Bank Program
Allows the state to acquire and preserve abandoned rail lines for future transportation use or for transmit-ting energy, fuel or other commodities.

Additional information on the Minnesota Rail Service Improvement Program may be obtained from:

MN Railway-Highway Crossings Program Section 130

Title 23 of United States Code (USC) Section 130 provides federal funding to States annually for the elimination of hazards at railway-highway crossings. The Section 130 Program has been correlated with a significant decrease in fatalities at railway-highway grade crossings since the program inception in 1987. The overall reductions in fatalities come despite an increase in the vehicle miles traveled on roadways and an increase in the passenger and the freight traffic on the railways.

A risk-based approach has been implemented for our project selection process. MnDOT is using the following risk factors when looking at passive crossing locations: (1) roadway AADT, (2) total trains per day, (3) exposures (roadway AADT multiplied by total trains per day, (4) maximum timetable speed, (5) skew, (6) distance to near by intersection, (7) distance to nearest crossing, (8) clearing sight distance, and (9) approaching sight distance.

In addition to these factors, our office solicits the railroads for locations that currently have an active warning device at those crossings. Parts may be hard to locate or obsolete, and the active warning device may be reaching the end of its useful life. More than half of our Section 130 funds are focused on replacing these antiquated systems.

Our office also receives input from the cities, counties and townships each fiscal year with their highest priorities. Projects identified as having the highest number of risk factors are funded that year, with those funds being managed and administered centrally.

Port Development Assistance Program

The Port Development Assistance Program was de-veloped by the state in response to the needs of the commercial navigation system. There are currently no dedicated federal funds available. The program provides a funding source that helps to ensure the continued commercial effectiveness of lake and river navigation terminals and helps to offset increases in the general costs of commercial shipping.

A number of conditions exist that warrant the port development assistance program in Minnesota. Many of the public terminals and docks in the state are in need of rehabilitation at costs beyond the means of local agencies. Local port authorities need help keeping their infrastructure intact, especially for our agricultural and mining industries. Funding from the program is used for facility and infrastructure up-grades and rehabilitation, facility expansion, capacity expansion, and systems upgrades.

Project proposals are prioritized based on need, em-ployment generated and overall economic benefit. MnDOT's Office of Freight and Commercial Vehicle Operations, working with the state's port authorities, has identified a list of potential harbor improvement projects for 2024 and beyond. Past projects include rehabilitating or improving rail and truck access, dock walls, building roofs, sprinklers and electrical systems, mobile handling equipment and adding ware-house capacity.

The Minnesota Legislature has made the following appropriations to the Port Development Assistance Program:

- 1996-2017 - $27 million (Bonds)
- 1996-2017 - $8 million (General Funds)
- 2018 - $5.2 million (Bonds)
- 2020 - $14 million (Bonds)
- 2023 – $18.1 million (Bonds)

To date, total state appropriations for the Port Development Assistance Program amount to $72.3 million. The Ports have identified an additional $150 million of future port development needs. According to Minnesota law, Port Development Assistance funds cannot be added to other state sponsored port investments. Port Development funds can be used with federal and local dollars to complete projects that benefit a port.

Additional information about the Port Development Assistance Program may be obtained from:

MnDOT State Road Construction Program

In developing the 2026-2029 STIP, only federal-aid highway formula funds were subject to the ATP prioritized process. State funded projects are included in the STIP for informational purposes and were shared and discussed with the ATPs. MnDOT anticipates a high degree of flexibility in the use of federal or state funding sources for individual projects.

The estimated average annual state funds available for trunk highway construction activities is $424 million. Actual amounts are slightly higher with a mod-est level of over programming. However, a portion of those state funds are reserved for statewide initia-tives shown in District ATP C.

State funds are available to each MnDOT District to cover the following items in priority order:
1.Match federal dollars received through the ATP process Earmarked funding, Allocated funding, or IIJA Grants.

2.Estimate necessary District set-asides to cover supplemental agreements and cost overruns.

3.Estimate of right-of-way needs to cover all trunk highway projects, with appropriate lead time for expenditures. A single account will still be monitored by the MnDOT Office of Land Management. The MnDOT Districts must identify the expenditures for the correct State Fiscal Year (SFY).

4.A prioritized list of all other state funded projects or setasides. This list will include all Municipal Agreement Projects, Bridge and Road Construction Projects and Landscape Partnerships.

5.Estimates for District setasides to cover internal salaries, external consultant services, project development and program support.

MnDOT's State Road Construction Program (SRC) is legislatively constrained by an annual budget level. The exact budget level can vary by biennium. The STIP program level may not coincide with the SRC budget level if MnDOT is more or less successful than anticipated during the ATP process. If the program level is significantly higher, legislative action would be required to raise the budget level. The STIP is fiscally constrained, but MnDOT's SRC budget includes a level of advance construction programming.

Project totals (all four years of the STIP) for the MnDOT State Road Construction Program (SRC) are provided in Figure A8. Figure A9 gives the SRC program totals by District/ATP and year. Totals for the SRC include dollars funded by federal advance construc-tion funds, which may exceed actual federal dollars available in any given year since AC may be converted over more than one year.

Appendix B: Federal Performance Measures & Targets

Federal Performance Measures and Targets

MAP-21, signed into law in 2012, established performance-based planning and identified the federal performance measures for safety, pavement, bridge, reliability, freight, CMAQ and transit asset management. The requirements continued through the FAST Act, signed into law in 2015 and the IIJA signed into law in 2021. States are required to develop short term targets for each federal measure and the projects selected for the STIP are also required to support achievement of these short-term targets.

MnDOT has a mature system of performance measurement and performance-based planning which was established long before the above referenced federal legislation. Minnesota GO started with the 50 year vision for transportation but extends to an entire family of plans that provide direction for different modes of transportation (highways, transit,rail, bikes, pedestrians, freight, aviation). The Statewide Multimodal Transportation Plan establishes guidance and priorities for state transportation decisions. System Investment Plans offer mode specific strategies and guidance, establish performance measures and performance-based needs,conduct risk-based assessments and investment tradeoffs, and identify system priorities.

MnDOT establishes performance measure and targets through a public and stakeholder driven process, typically as part of long-range planning efforts. State measures identified in the family of plans have allowed MnDOT to track performance over time and inform decisions about how to invest and operate Minnesota's transportation system. A target for a state performance measure generally describes a desired outcome, a goal MnDOT continuously works to achieve. Federal measures require setting short-term targets that are more accurately described as expected outcomes, or what MnDOT thinks will happen. Transportation projects are programmed four-years out in the STIP and identified for the subsequent six-years in the CHIP.

Federal short term performance targets are set in coordination with the MPOs and are generally based on the expected outcomes from programmed projects, which are selected based on investment direction in our long-range plans.

The integration of federal performance measures with MnDOT's state performance measure system and performance-based planning process is ongoing. MnDOT has established and reported on all required federal performance targets.

Safety

The FHWA Safety Performance Measure Rule (PM1) established five safety performance measures to carry out the Highway Safety Improvement Program (HISP). Safety performance targets are submitted annually as 5-year rolling averages to the FHWA as part of the HSIP Report. These performance measures are:

- Fatalities
- Fatality rate per 100 million VMT
- Serious injuries
- Serious injury rate per 100 million VMT
- Non-motorized fatalities and serious injuries

Typically, targets for three measures (fatalities, fatality rate, and serious injuries) must align with targets submitted by Minnesota Department of Public Safety (DPS) to the National Highway Traffic Safety Admin-istration (NHTSA). A waiver for this requirement has been issued for the last two years.

The 2025-2029 Strategic Highway Safety Plan (SHSP) is Minnesota's plan to reduce fatalities and serious injuries on all public roads. The plan set a bold target of no more than 225 traffic deaths and no more than 980 serious injuries by 2030. Based on feedback from partners, no 2026 Target would be set higher than the prior year. All 2026 Targets are equal to the targets set for 2022, 2023, and 2024 rather than the progression set in the Strategic Highway Safety Plan.

Minnesota has not met or made significant progress toward meeting targets in calendar year 2024. Per federal regulations, Minnesota must use obligation authority equal to FY 2023 HSIP apportionment only for HSIP projects in FY 2027 and submit a HSIP Implementation Plan for FY 2027.

Pavement and Bridge Condition

The FHWA Pavement and Bridge Condition Performance Measure Rule (PM2) established performance measures to assess pavement condition and bridge condition for the National Highway Performance Program. Pavement and bridge condition performance is assessed and reported over a four-year performance period. The first performance period began on January 1, 2018 and ran through December 31, 2021. The current four-year performance period covers January 1, 2022, to December 31, 2025, with additional per-formance periods following every four years. These performance measures are:

- Percentage of Interstate Pavement in Good Condition
- Percentage of Interstate Pavement in Poor Condition
- Percentage of Non-Interstate NHS Pavement in Good Condition
- Percentage of Non-Interstate NHS Pavement in Poor Condition
- Percentage of NHS Bridges in Good Condition
- Percentage of NHS Bridges in Poor Condition

Two and four-year targets were established at the beginning of the current four-year performance period, with the option to update four-year targets at the two-year mark mid-cycle. Two-year targets for the current performance cycle represent expected pavement and bridge condition at the end of calendar year 2023, while the four-year targets represent expected condition at the end of calendar year 2025.

MnDOT continues to follow its investment direction for significant pavement condition investment. The MnDOT pavement management system is not able to make predictions for the federal measures. Federal 2 and 4-year targets are set using the predicted values of MnDOT's state measures and their observed relationship to the federal measures.

Results indicate MnDOT will meet the two-year federal targets for the 2022-2025 period for three of the four measures. MnDOT did not meet it's 2-year expected outcome target for Non-Interstate percent good, and is revis-ing it's 4-year expected outcome target to 40%. Per federal regulations, MnDOT must submit additional reporting that documents a description of actions that will be taken to achieve federal pavement condition targets.

The state legislature approved new funding in 2017 and MnDOT spent a large portion of it on long life pavement projects on the NHS to bring them out of poor condition. This increased investment both improved the current NHS conditions and extended their remaining service life. Pavement investment strategies include a focus on preventive maintenance activities; use of operational budget for maintenance of pavement; and applying a mix of fixes to extend the useful life and reduce life-cycle costs.

MnDOT projects bridge condition based on its state measures, but the state and federal bridge measures track very closely. Federal 2- and 4-year targets are set using the predicted values of MnDOT's state mea-sures and their observed relationship to the federal measures. Results indicate MnDOT will not meet the two-year federal targets for the 2022-2025 period for either bridge condition measure. MnDOT is revising it's 4-year federal expected outcome target for NHS bridges in good condition to 20%. Per federal regulations, MnDOT must submit additional reporting that documents a description of actions that will be taken to achieve federal bridge condition targets.

Figure B1: Minnesota Federal Safety Performance Measures and Targets

Performance Measure	2022 Actual and 5-year average	2023 Actual and 5-year average	2023 Baseline (2017 - 2021 5-year average)	2025 Target (5-year average)
Fatalities	444/414.2	409/419.8	397	352.4
Fatility rate (per 100 million VMT)	0.772/0.722	0.703/0.739	0.695	0.582
Serious Injuries	1910/1676.2	2007/1745.6	1,664	1,463.40
Serious injury rate (per 100 million VMT)	3.322/2.924	3.448/3.066	2.908	2.47
Non-motorist fatalities and serious injuries	337/282.2	286/285.4	280.8	258.4

Figure B2: MnDOT Federal Pavement Performance Measures and Targets

Performance Measure	Baseline Condition/ Performance 2021	Condition/ Performance 2023	2-year Target (2023)	4-year target (2025)
Percentage of Intersate Pavement in Good Condition	70.9%	71.2%	60.0%	60.0%
Percentage of Interstate Pavement in Poor Condition	0.6%	0.4%	2.0%	2.0%
Percentage of Non-Interstate NHS Pavement in Good Condition	61.4%	53.2%	55.0%	40.0%
Percentage of Non-Interstate NHS Pavement in Poor Condition	0.5%	1.0%	2.0%	2.0%

Figures B3: MnDOT Federal Bridge Performance Measures and Targets

Performance Measure	Baseline Condition/ Performance 2021	Condition/ Performance 2023	2-year Target (2023)	4-year target (2025)
Percentage of NHS Bridges in Good Condition	31.8%	29.7%	30.0%	20.0%
Percentage of NHS Bridges in Poor Condition	5.8%	6.2%	5.0%	5.0%

MnDOT continues to follow its investment direction that calls for significant funding to go towards bridge condition investment. Recognizing the importance of using sound asset management principles to better address the priorities and needs of Minnesota bridg-es across the entire program, MnDOT is championing several asset management strategies for both the short and long term. Bridge investment strategies include performing maintenance activities focused on preventive repairs; completing individual bridge management plans for high priority preservation bridges; and evaluating bridge condition models and performance targets to better forecast investment needs.

Reliability and Congestion Mitigation and Air Quality Improvement (CMAQ) Program

The third FHWA Performance Measure Rule (PM3) established measures to assess reliability of the highway system and the CMAQ Program. MnDOT is no longer required to report measures and targets for the CMAQ program. The highway reliability perfor-mance measures are:

- Percent of person-miles on the Interstate system that are reliable
- Percent of person-miles on the non-Interstate NHS that are reliable
- Truck Travel Time Reliability Index (TTTR)

Two and four-year targets were established at the beginning of the four-year performance period, with the option to update four-year targets at the two-year mark mid-cycle. Two-year targets for the current performance cycle represent expected reliability at the end of calendar year 2023, while the four-year targets represent expected condition at the end of calendar year 2025. MnDOT estimates expected reliability by building off the baseline, but including adjustments based on judgement.

Reliability on the highway system increased dramatically due to the pandemic in 2020, while some bounce-back has occurred travel patterns are still uncertain and targets for the 2022-2025 reporting peri-od were set conservatively. Results indicate MnDOT will meet the two-year federal targets for the 2022-2025 period and expects to meet the 4-year targets.

MnDOT continues to follow its investment direction that calls for some funding to go towards mobility improvements on state highways. These improvements include; active traffic management strategies, spot mobility improvements and a network of EZPASS lanes. MnDOT also continues to invest in operational strategies to improve reliability including robust statewide snow and ice operations and incident clearance on metro area freeways. Investment strategies in the Twin Cities region also align with the Metropolitan Council's 2040 Transportation Policy Plan.

MnDOT has utilized the National Highway Freight Program federal funds to address truck freight mobility on locations selected on a competitive basis through the Minnesota Highway Freight Program. Freight investment strategies include using public-private partnerships where possible; use of advanced technology; integrating freight considerations in pub-lic agency decision making; and adding truck parking at MnDOT-owned facilities.

Transit Asset Management

The Federal Transit Administration (FTA) established four performance measures to evaluate state of good repair for transit assets. These performance mea-sures are:
•Rolling Sock: Percentage of revenue vehicles ex-ceeding useful life benchmark
•Equipment: Percentage of non-revenue service vehi-cles exceeding useful life benchmark
•Facilities: Percentage of facilities rated under 3.0 on the TERM scale
•Infrastructure: Percentage of track segments under performance restriction

Transit Asset Management (TAM) in MnDOT's Office of Transit and Active Transportation (OTAT) provides consistent, accountable, and transparent program guidance for all Greater Minnesota transit providers. It aids in the decision making process of balancing asset needs and demands for rolling stock, facilities, and equipment. For OTAT, rolling stock mainly includes revenue bus vehicles and no rail vehicles. Equipment mainly includes non-revenue service vehicles. Facilities range from General Purpose Main-tenance – Overnight Storage Facilities to combined Administrative and Maintenance Facilities including service and inspection.

The MnDOT sponsored group Transit Asset Management (TAM) plan includes all 27 of Minnesota's Section 5311 rural transit systems. None of these transit systems currently have rail rolling stock or track segments. MnDOT and the transit systems developed the following performance targets for the TAM measures:

•All Rolling Stock: No more than 10% exceeding their Useful Life Benchmark (ULB)
oCutaway Buses (CU): 10-year ULB
oBus (BU): 14-year ULB
•Facilities: No more than 10% rated less than 3 on the FTA Transit Economics Requirements Model (TERM) Scale (1-5)
oState of Good Repair being considered as 2.5 or greater
•Equipment ($50,000 or more): No more than 10% exceeding ULB

MnSHIP Investment Priorities

The Minnesota State Highway Investment Plan was adopted in February 2024 and directs capital investment for Minnesota's state highway system. The plan's investment priorities provide the framework to support the federal performance targets. The MnSHIP identified a combined investment goal of 61% of funds toward pavement, bridge, and roadside infrastructure condition improvements. MnDOT uses the Bridge Office Replacement and Improvement Sys-tem (BORIS) prioritization tool to identify its bridge investments. The total need amount in Bridge Condi-tion is based on investing in all state highway bridges at optimal points in their life cycle over the next 20 years. BORIS also accounts for other factors in rank-ing priority for bridge projects, such as traffic volume, highway classification, and special vulnerabilities.

MnSHIP identified an investment goal of 4% of funds toward safety to continue safety related infrastructure improvements. Infrastructure improvements alone, though, cannot achieve the goal of toward zero death (TZD) or the federal safety targets. Driver behavior is also a critical factor.

MnSHIP also identified an investment goal of 3% of funds toward highway mobility improvements. The work identified included the build out of managed lanes and investment in operational and capital improvements at locations experiencing high travel time delay in the Twin Cities metro area and Greater Minnesota.

MnSHIP called for an investment goal of 3% of funds toward the maintenance and improvement of bicycle and pedestrian networks on state highways. This includes the goal of substantial ADA-compliance by 2037. MnDOT is also working on installing accessi-ble pedestrian signals at all signalized intersections and undertaking strategic stand-alone projects to fill gaps in the sidewalk network or as part of complete streets projects. MnDOT has completed its Statewide Bicycle System Plan, District Bicycle Plans and Pedes-trian System Plan which provide direction on how to make improvements for pedestrians and bicyclists on Minnesota state highways.

Figure B4: MnDOT Federal Reliability Performance Measures and Targets

Performance Measure	Baseline Condition/ Performance 2021	Condition/ Performance 2023	2-year Target (2023)	4-year target (2025)
Percentage of Person Miles Traveled on the Interstate that are reliable	94.4%	91.2%	82.0%	82.0%
Percentage of Person Miles Traveled on the Non-Interstate NHS that are reliable	96.1%	93.2%	90.0%	90.0%
Truck travel Time Reliability Index (TTTR Index)	1.24	1.33	1.4	1.4

Appendix C: MnDOT Detailed Federal Fiscal Constraint Plan

The Detailed Federal Fiscal Constraint Plan in Figure C1 shows how MnDOT will be managing Advance Construction (AC) from 2026 through 2029. AC conversions (Paybacks) identified in the STIP are referred to as "Planned AC Conversion." District/ATPs have identified and planned for these project conversions. Along with STIP identified "Planned AC", the Office of Financial Management manages the program on a statewide basis using AC to provide for greater financial flexibility and to manage cash flow.

History shows that projects exceeding $1 million are more likely to be paid out over more than one year. Recent project expenditure payouts are more in line with 50% in the first year, 40% in the second year, and 10% in the third year. For this reason, many projects can be adjusted to more closely reflect the actual timing of these expenditures. Use of these rates on additional AC projects allows MnDOT to maximize the use of Federal funding. The Office of Financial Management manages the conversions of these projects on a statewide basis and refers to these projects as "Managed AC Conversions."

Both "Planned AC Conversions" and "Managed AC Conversions" are generally processed based on the same criteria. The "unbilled" amounts usually determine the amount of AC that will be converted. The "unbilled" amounts are costs MnDOT has already incurred and have not yet invoiced FHWA for reimbursement because the project currently does not have any or enough federal funds obligated. Although the amount of "unbilled" is a driving factor in processing conversions, there are other important factors that can determine which AC to convert. These include, but are not limited to, the availability of apportionments and the amount of available obligation authority received to date.

Figure C1 illustrates how AC is used to manage MnDOT's program. Lines (1) through (3) come from the STIP. Line (1) is the total Federal formula funds in the STIP for each year. Line (2) represents the amount of regular funds in the STIP total. Line (2a) shows projects that were converted early. Line (3) is the amount of "Planned AC Conversions" in the STIP total. Line (3a) is the amount of Planned AC Conver-sions that were converted early. Line (4) shows the planned amount of Line (2) for new managed AC for the current year. Line (4a) is the new managed AC percentage of regular federal funds. Line (5) is 50% of the new managed AC from the current year. Line (6) is 40% of the new managed AC from the prior year. Line (7) is 10% of the new managed AC from 2 years back. Lines (5) through (7) total the amount of managed AC in that state fiscal year. Line (8) is the difference between lines (2) and (4) representing the forecasted sum of the projects that are expected to use 100% of their Federal funds in that year. Line (9) is the same as line (3). Line (10) comes from analysis of the Planned Conversions which are anticipated to convert at a different rate than the expected 50% -40% - 10%. Line (10) is the sum of lines (5) through (7).

MnDOT plans to continue its use of AC as a financial management tool. MnDOT's intention is to encourage the use of AC by the District/ATPs when projects can be packaged, or completion of a project will occur over more than one construction season. At the same time, MnDOT will centrally manage AC to ensure sound financial management.

Minnesota Projected Levels of AC

Projected level of AC MnDOT will be carrying over at the end of each state fiscal year is shown in the STIP Financial Plan. The ending level of AC includes those projects that were authorized by the Federal Highway Administration (FHWA), have been let, awarded and encumbered by the State. The state fiscal year runs from July 1 to June 30. Trunk Highway Projects that are authorized by FHWA but have not gone through the final process of encumbrance are not counted in the year Ending Balance of AC. The AC Beginning Bal-ance comes from the previous years ending balance. New AC – Planned can be found in the STIP.

New AC – Managed, Managed Conversions, as well as the Planned Conversions can be found in Figure C1 as well as the STIP Financial Plan.

The strategy of using Managed AC on projects that were not planned to be Advance Constructed through the normal process allows MnDOT to man-age through a time when Federal Funding could be uncertain. This practice will allow MnDOT to be able to absorb a reduction in Federal funds in a year and not have to reduce the short-term program, but still make the necessary corrections in the following year(s). Once current year Federal funds become available MnDOT will reevaluate the need to AC proj-ects that fall in this group.
